

ANTENNA BOOK, ARRL — A wealth of practical information on antennas, feed lines and propagation. Includes software with Yagi Analysis program and propagation prediction, transmission line analysis and general utility programs.

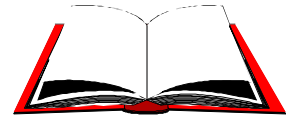

ANTENNA COMPENDIUM, ARRL — Overflow from QST manuscript submissions. A wealth of material on antenna design and construction. **Volumes I, II, III, IV, V.** (specify which).

ARRL HANDBOOK — For decades, this book has established itself as THE reference book for hams, engineers, and technicians. Subjects range from analog electronic theory to transceivers, repeater to DSP, circuit construction to interference, transmission lines to antennas and propagation.

DATA BOOK, ARRL — Doug Demaw, W1FB. One source for all those regularly used electronics tables, charts and formulas. Plus, hundreds of popular circuit diagrams of oscillators, mixers, amplifiers, and other active devices and their operating parameters.

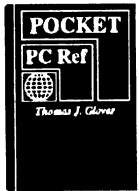

NTE REPLACEMENT SEMICONDUCTOR CROSS REFERENCE BOOK — 3500 semiconductors cross-reference to over 250,000 US, Japanese, & European part numbers. Includes technical information. \$5.00

NTE BOOK ON DISK — Load the NTE guide on your computer. \$7.45

OPERATING MANUAL, ARRL — The most complete book about amateur radio on the air operating ever published. **1086 ARRL**

POCKET REF — Amazing little black book of facts, figures, equations, and tables (ex: air & gases, automotive, carpentry & construction, chemistry, computers, electrical, electronics, general science, geology, glue, hardware, math, mines, money, plumbing, rope, metals, surveying, tools, water, weights, welding, conversion tables, and much more). 3rd edition. **POCKET REF.**

POCKET PC REF — The computer equivalent to the above **POCKET REF.** Includes ASCII codes & numerics, PC hardware, printer control codes, modems & BBSs, MSDOS commands, Windows Keyboard shortcuts, hard drive specifications, floppy drive specifications, PC industry phone book, etc. You'll wonder how you ever got along without it!
POCKET PC REF.

RFI BOOK, ARRL — Practical cures for radio frequency interference. Covers telephones, power lines, TVs, computers, VHF Intermod, and more!

TECHREF — ASCII & numerics, PC hardware standards, port pinouts, modem standards, UARTs, MSODS commands, Windows keyboard shortcuts, hard drive specifications, CD-ROM specifications, magneto optical drive specifications, floppy drive specifications, printer control codes, PC industry phone book. **TECH REF.**

WINREF 98-95 — Pocket sized reference guide to windows. A quick reference to the commands, functions, and operations of Microsoft's Windows 98 & 95 operating systems. **WinRef**
